## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-7, 9, 10, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krieg et al. (EP 639539) in combination with Hwa et al. (USPN 3,661,994), for reasons cited in the previous action.
3. Claims 1-10, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krieg et al. in combination with Hofmann (USPN 4,180,529) or Henton et al. (WO 88/05450), for reasons cited in the previous action.
4. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krieg et al. in combination with Alsmarraie et al. (USPN 5,087,662), for reasons cited in the previous action.

### ***Response to Arguments***

5. Applicant's arguments filed 12/22/03 have been fully considered but they are not persuasive.

6. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

7. In response to applicant's argument that the references do not teach the composition to be useful in sanitary-ware, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

8. In response to applicant's argument that the references (in particular Krieg et al.) do not aim to achieve improved resistance to scratching, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Art Unit: 1713

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, while Krieg et al., differs from the claimed invention in that it is not explicitly disclosed to comprise elastomers, it is known in the art to incorporate particulate elastomeric polymers with an elastomer core and matrix compatible shell elastomers into rigid elastomeric molded part such as from poly(methyl methacrylate), for the purpose of imparting improved impact strength onto the products through the elastomer whilst maintaining good adhesion between the elastomer (core) and the continuous matrix phase through the matrix compatible outer shell, such as taught by Hwa et al. (See col. 1, lines 28-30 and 65-72), for the purpose of imparting improved impact strength onto the products, whilst maintaining good adhesion between the elastomer particles and the continuous matrix phase and/or whilst reducing the stress whitening of the products and maintaining good weatherability, such as taught by Hofmann (See col. 1, lines 19-25 and 42-52) or Henton et al. (See page 3, lines 4-26) and, for the purpose of imparting increased impact strength onto the products, such as taught by Alsmarraie et al. (See col. 5, lines 10-14).

Art Unit: 1713

9. The rejections are valid and **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kelechi C. Egwim whose telephone number is (703) 306-5701. The examiner can normally be reached on M-T (7:30-6:00).
